

1. Open the app.

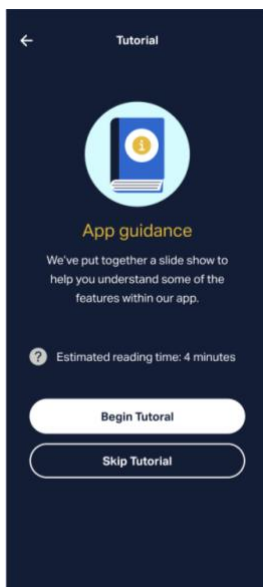

2. Sign Up if you don't have account. If you have any access needs fill it in during the sign up including your emergency contact number.

A screenshot of the Briteway app's sign-up form. The title is "Sign up" with a back arrow. The section is titled "Create an account" with the instruction "Complete the form below in order to create your Briteway account." The form includes fields for "First name" (with a red border and error message "First name is required"), "Last name", "Email" (pre-filled with "email@email.com"), "Password" (pre-filled with "Enter password"), and "Confirm Password" (pre-filled with "Enter password"). Below these is a dark blue box with a white accessibility icon and the question "Do you have any access needs?". It includes an information icon and text: "If you have access needs, we can highlight facility status within stations." with "Yes" and "No" buttons. Below that is the "Emergency number" section with an information icon and text: "This is so you can contact someone you know and trust in an emergency." and a field "Enter phone number". A checked "Tickbox" is present. At the bottom, there is a "Sign up" button and a link "Already have an account? Log in".

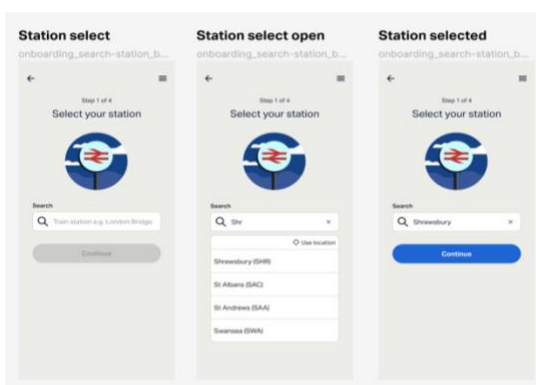

3. Log in

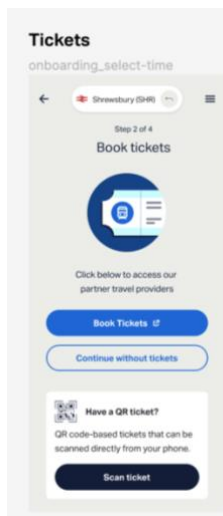

4. Take a tutorial of how the app works or if you went through the tutorial you can skip it.

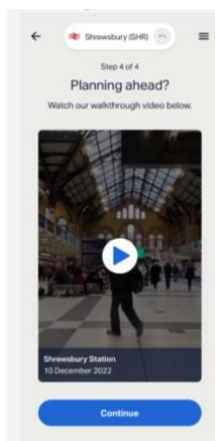

5. Select your station as show below.

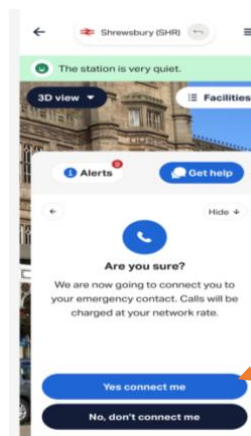

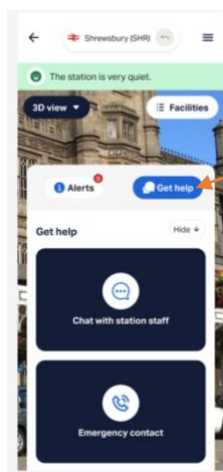

6. After selecting the station you have the option to book tickets or continue without booking tickets. If you already have a ticket you can scan it and store it in the app.

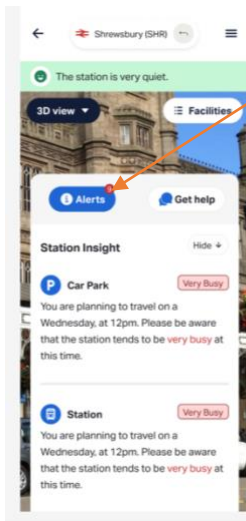

7. If you are planning ahead you can watch a quick video of the how the station looks like before you arrive.

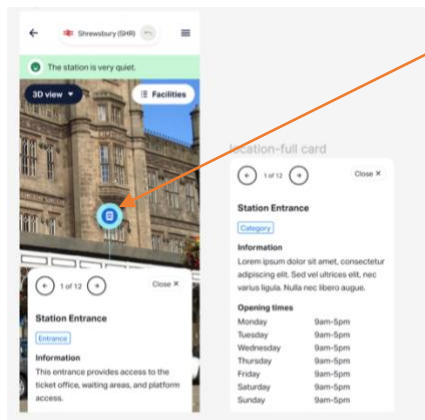

8. To get help click on the get help button. You have the option to use the AI chat or call your emergency contact. Click yes to call.

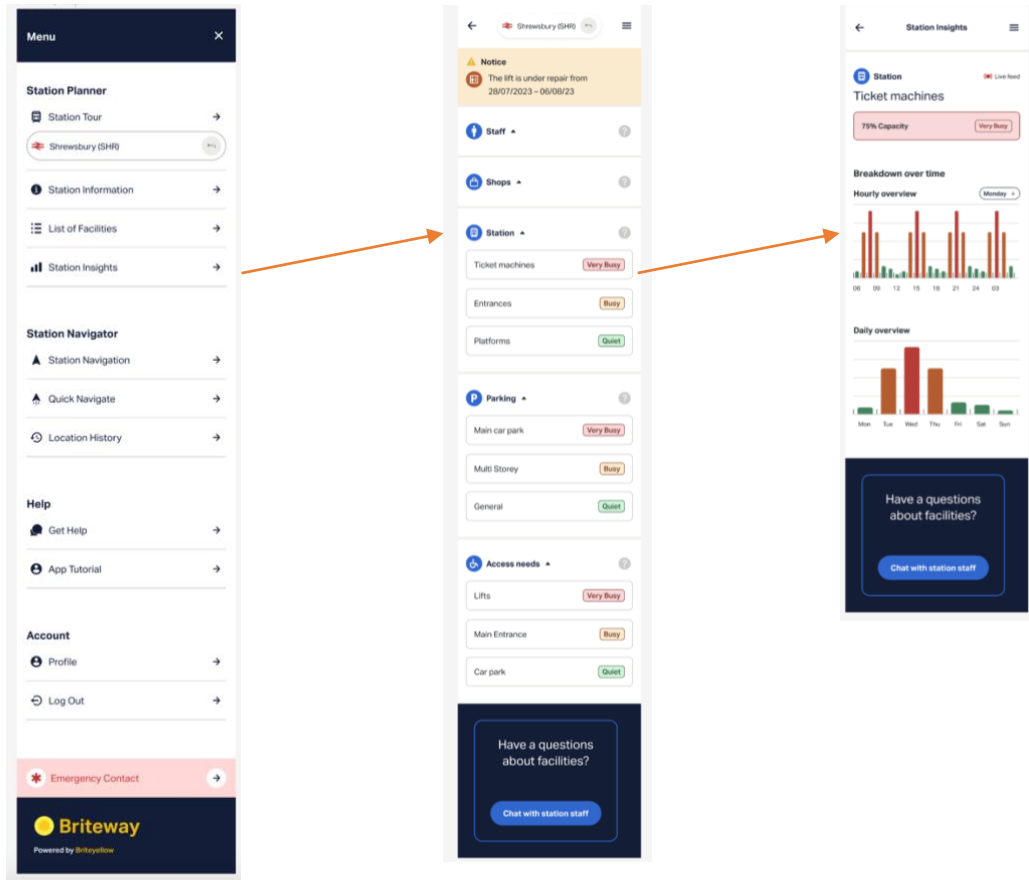

9. You can see all the active alerts by clicking on the Alerts button.

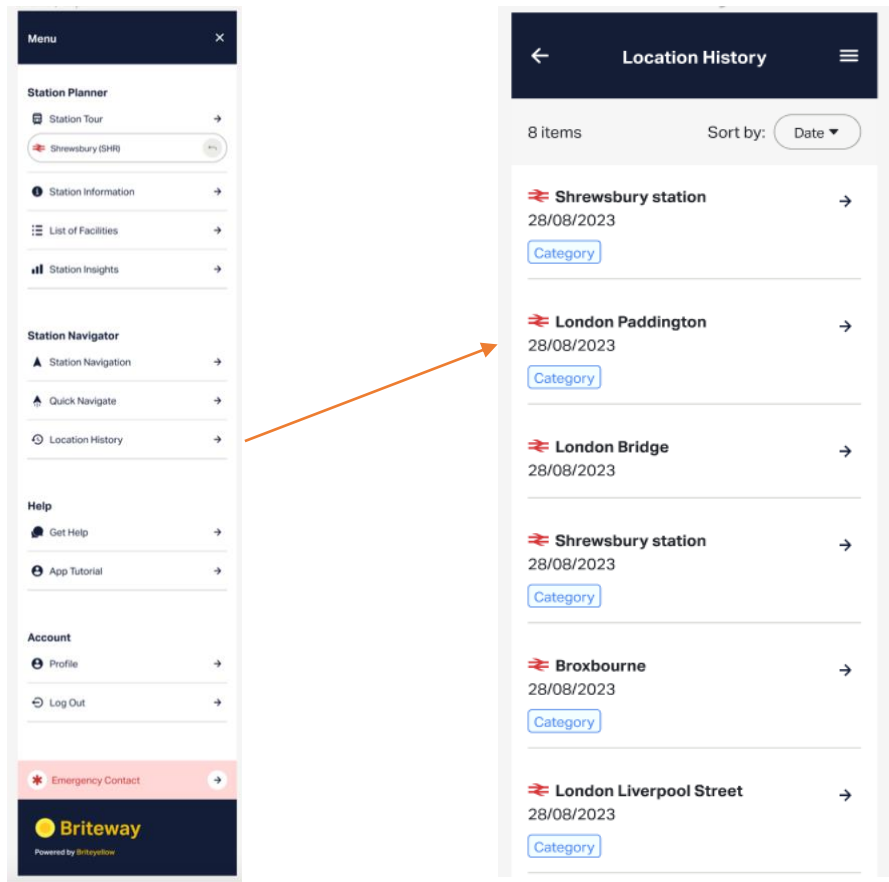

10. Click on the blue pin to see the location info of the current station and facility.

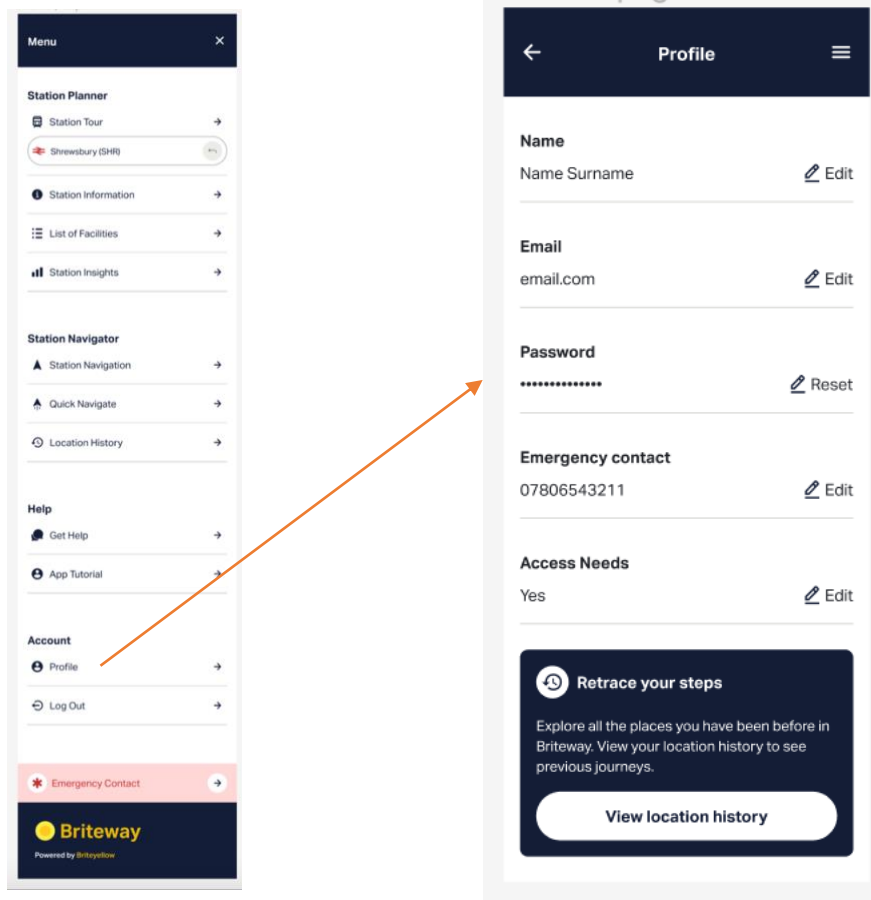

11. To access the Station Insights, click on the main menu on the top right of the screen. Click on any item from the insights page to see more details.

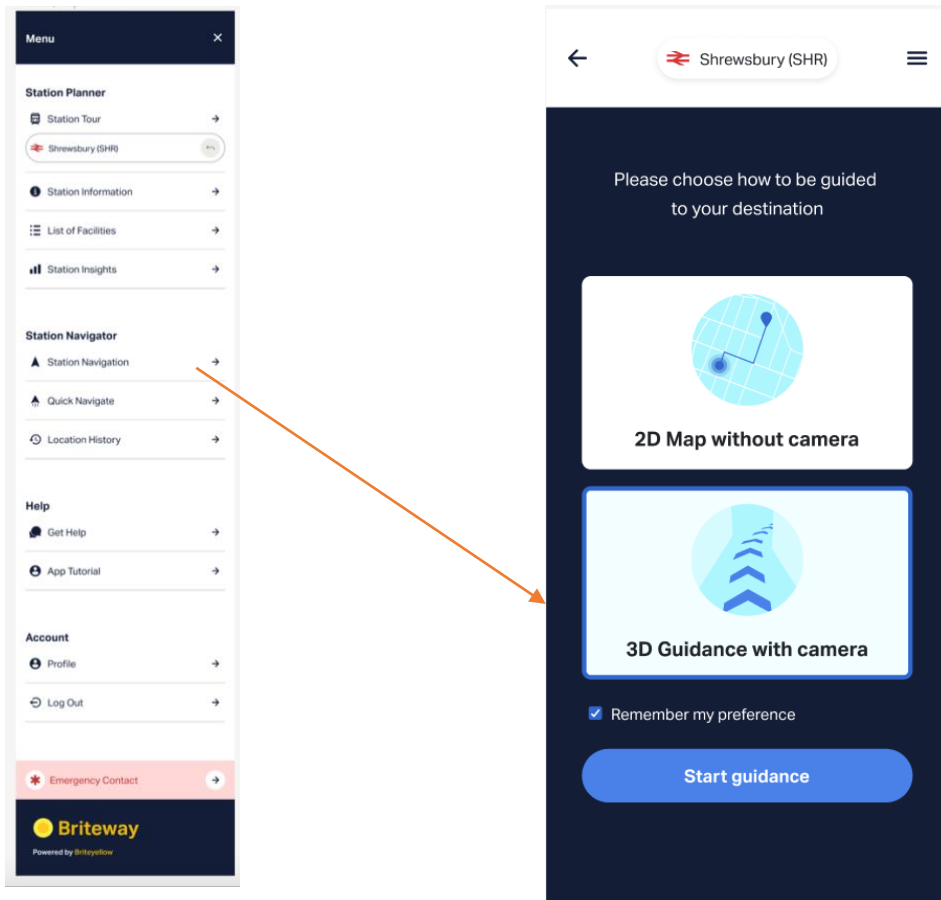

12. You can view your location history or re-navigate or book tickets etc from a station you have visited before.

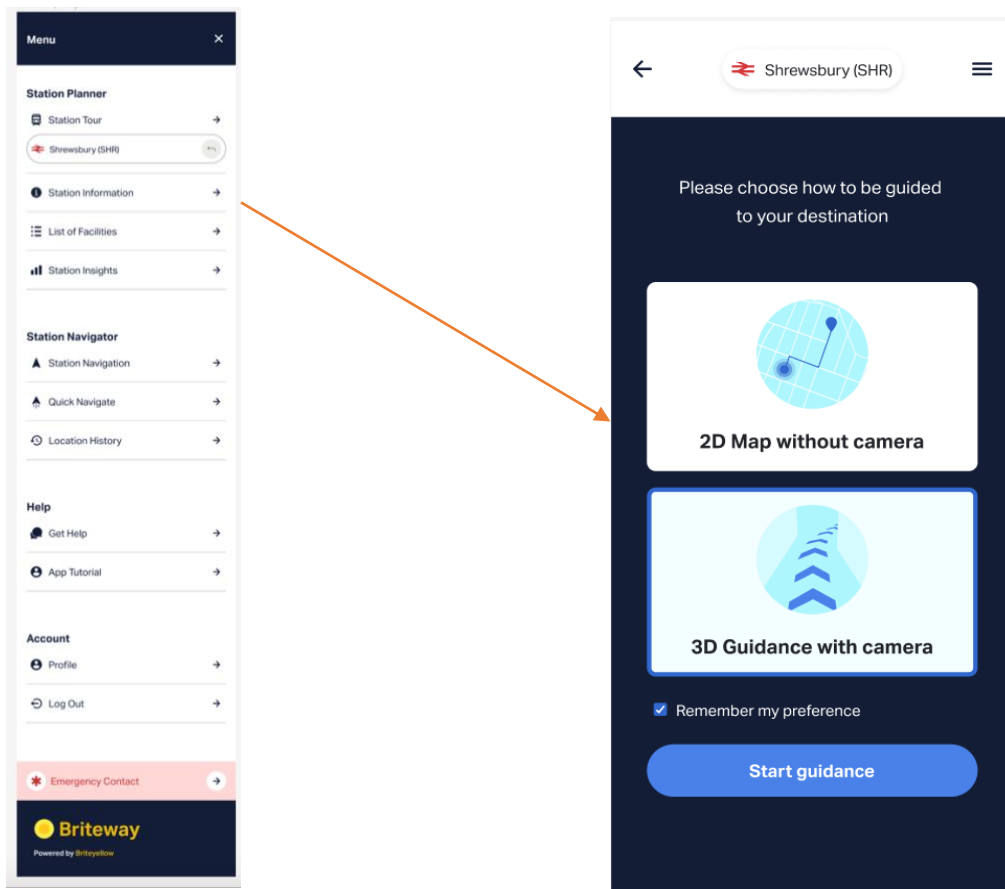

13. You can view and change your profile by clicking on the profile button.

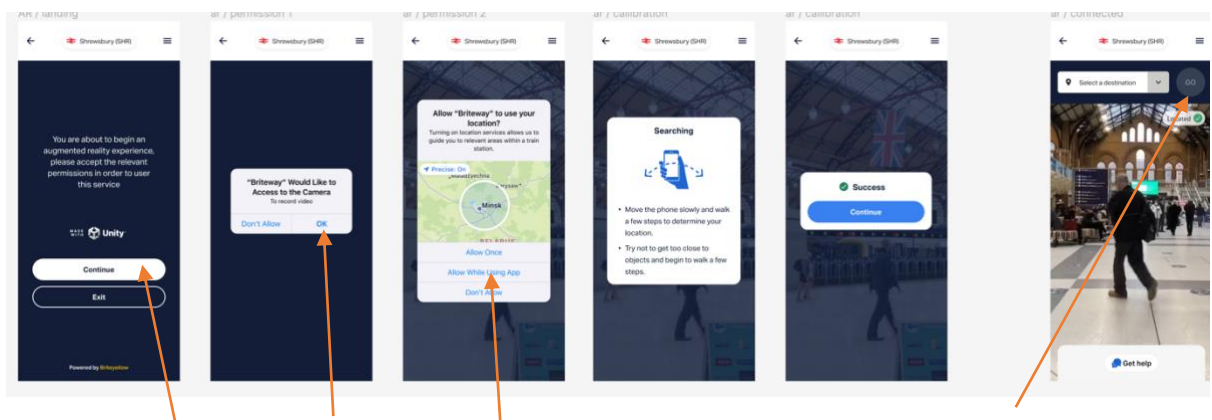

14. You can perform 3D Guidance with camera by clicking on the station navigation button and selecting the 3D Guidance with camera.

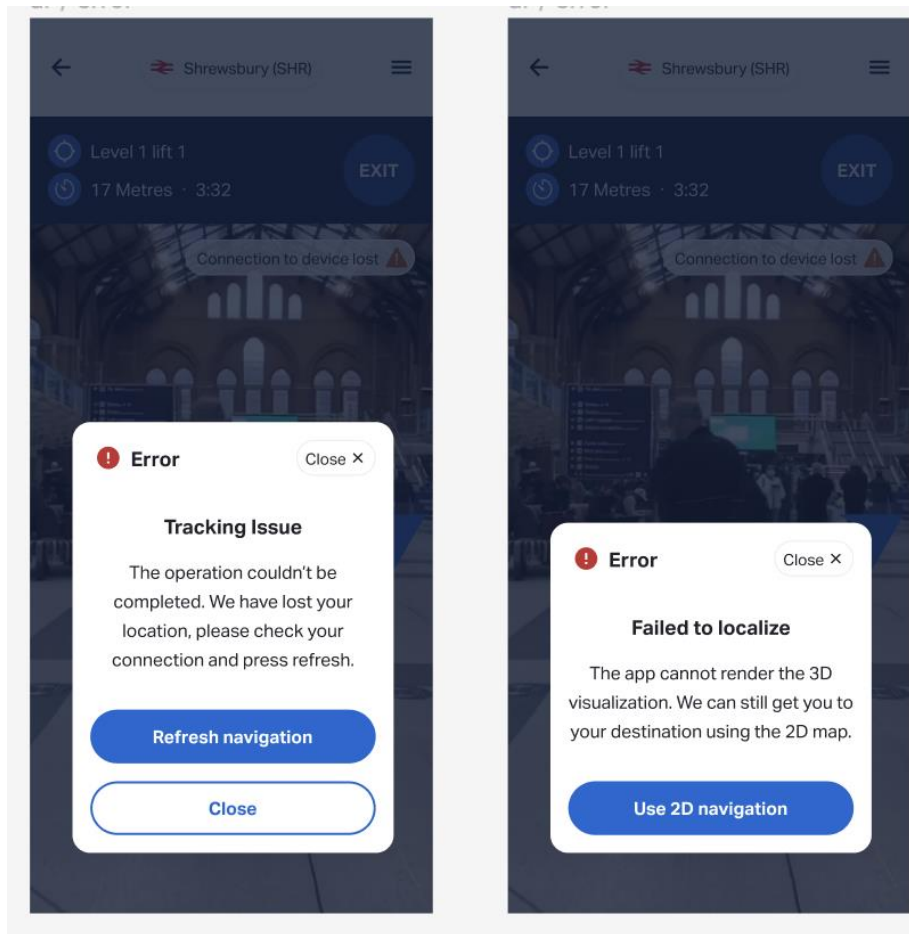

15. You can perform 2D Map Navigation without camera by clicking on the station navigation button and selecting the 2D Map Navigation without camera.

16. As soon as you lick the 3D Guidance with camera you need to click **continue**, **allow access to the camera** and **allow access to your location by clicking allow while using the app**. Then the app will search for your location and as soon as it gets it, it will show success and takes you to the next page where you select your destination, press go and get guided.

17. If the of the 3D Guidance fails, you have the option to refresh the navigation or continue with 2D navigation without camera.

18. 2D navigation without caera.
